Professional Summary

Full-Stack Developer and Banking IT Professional with 4+ years of professional software development experience and 9+ years of banking-sector experience.

Experienced in building multi-tenant enterprise applications using TypeScript, React, Node.js and PostgreSQL, with practical experience in Docker, DevSecOps, CI/CD and AI-assisted development using Cursor.

Currently responsible for digital payment operations and cyber-cell activities across UPI, IMPS, NEFT and RTGS, combining software engineering experience with financial-services and security-domain knowledge.

Education & Training

Pacific University

Civil Engineering

Bachelor of Technology (B.Tech.)

Udaipur, Rajasthan, India • 2010 – 2014

Work Experience

Gujarat Gramin Bank

Digital Banking & Cyber Cell Operations

Vadodara, India

June 2026 - Present

Monitor and support digital payment and settlement operations across UPI, IMPS, NEFT and RTGS, including transaction exceptions, reconciliation and issue resolution.

Coordinate with technology, operations and external payment-system stakeholders on transaction processing, service availability and operational incidents.

Support cyber-fraud monitoring and incident investigation, including transaction analysis, case reporting and coordination of preventive/corrective actions.

Analyse transaction-related incidents and support implementation of security and operational controls.

Gujarat Gramin Bank

Full Stack Developer

Rajkot, India

Aug 2022– June 2026

Developed and maintained internal web-based business applications using React.js, TypeScript, Node.js, Express.js and PostgreSQL.

Built REST APIs and frontend modules for business workflows, data management and operational processes.

Implemented application features including authentication, authorisation, role-based access control and session management.

Worked on database design, API integration, debugging, performance improvements and resolution of application issues.

Rajkot, India

Mar 2017 – Aug 2022

Developed practical understanding of financial transaction workflows, customer operations and banking processes, supporting later transition into software and digital banking.
